EXPERIENCE

Questrade Financial Group

- Senior product designer, design system| Jan 2025 - April 2026
- Intermediate design system designer | Apr 2023 - Jan 2025
 - Worked as part of Questrade's Design System team, contributing to the development and maintenance of reusable components for products like Customer Portal and QuestMobile.
 - Responsible for creating design tokens, establishing consistency and scalability to enable multiple theme creation across products, saving +8 months of timeline for new platforms like Atlas Trading.
 - Updated existing components with accessibility considerations in line with WCAG standards, improving usability and making them more accessible for designers and end users across the team.
 - Collaborated with product and engineering teams to ensure seamless component implementation and alignment across design and development workflows.
 - Drove design system adoption by facilitating documentation, onboarding sessions, and cross-squad alignment to ensure consistent usage of components and patterns.
 - Collaborated on qualitative and quantitative research initiatives to gather user feedback, identify pain points, and guide design system evolution.
 - Leveraged MCP via Cursor and Figma to conduct AI-driven design system audits — identifying duplicate components, inconsistent tokens, and gaps in variables — and to support the creation of new tokens, variables, and prototypes.
 - Built AI-driven component documentation for AllSpark — Questrade’s design system — using Claude connected via Figma MCP, generating structured usage guidelines, do/don’t guidance, behaviour specs, anatomy breakdowns, and content guidelines at scale across the component library.

Tuuthfairy

- Product Designer (freelancer) | Nov 2022 - Nov 2024
- Designed and evolved the UI for a dental insurance product, shaping the visual system and enhancing user experience across core flows.

Mango X

- Product Designer | Jan 2022 - Oct 2022
- Led end-to-end product design for a dating app targeting serious relationships — conducting stakeholder interviews, running user surveys across 25–34 year-old heavy dating app users, and performing competitive analysis to identify three core market gaps: match overload, safety for women, and feature sameness across platforms.
 - Redesigned the onboarding flow and core matching experience to differentiate from a saturated market — introducing a drag-and-drop interaction model and a conversation limit to reduce ghosting, and a community-driven profile rating feature to improve safety for women.
 - Built product identity and visual language from scratch — from site map and user stories through wireframes, prototyping, and high-fidelity UI — validated internally with cross-functional stakeholders.

Vizir Software Studio

- Product Designer | Nov 2019 - Jan 2022
- UX/UI Designer | Mar 2015 - Nov 2019
 - Redesigned a white-label digital banking app after a rushed launch left the product rigid, undocumented, and rated 2.8 stars on the App Store — driving it to 4.1 stars post-relaunch and attracting five major new enterprise clients.
 - Facilitated a Lean Inception workshop with cross-functional stakeholders to align on product goals, personas, and MVP scope — replacing a failed Design Sprint attempt and unblocking the team on a clear strategic path.
 - Conducted competitive analysis and redesigned core user flows to address rigid, single-client architecture — decoupling UI from hard-coded logic to enable true white-label customization across branding and industry-specific features.
 - Owned the full product design process for a large-scale B2B eCommerce platform (employee benefit cards across nutrition, culture, and transport) — from discovery and user personas through wireframing, high-fidelity UI, A/B testing, prototyping, and usability testing.
 - Co-led all phases of a Design Sprint for a fleet management product — card sorting, user flows, sketching, wireframing, and high-fidelity prototyping — collaborating directly with stakeholders throughout.
 - Built a white-label design system from 0→1, enabling consistent, scalable delivery across multiple clients.

Naked Communications Brazil

- Web art director | Aug 2013 - Dec 2014
- Contributed to visual communication and interface design for a key client, designing and updating campaigns and digital touchpoints to support sales objectives.

Royal Pixel

- UI Designer | Jun 2012 - Aug 2013
- Designed structure and navigation for campaigns, promotions, blogs, and web portals.
 - Designed a dress-up game app for a major teen magazine, which won the Prêmio Abril — a leading Brazilian media award.

Zupi Design Editora Cultura e Entretenimento

- Webdesigner | Dec 2009 - Jun 2012
- Designed and developed websites and newsletter; graphic designer for their art magazine.

EDUCATION

Bachelor of Communication and Multimedia
Pontificia University Catholic of Sao Paulo (PUC-SP)
Brazil | 2007 - 2010

Skills & Tools

UI/UX design: Visual & interaction design, lo-fi/hi-fi prototyping, user flows, usability testing, eCommerce, identity systems, A/B testing

Design Systems: Design tokens & component architecture, multi-theme creation, system governance & scaling, accessibility (WCAG), design system documentation & adoption

Tools: Figma, Cursor (prototyping, MCP for design system, AI-driven UI, HTML & CSS), Adobe Creative Suite, Jira, Slack, Google Workspace
